

VX 40 Lens Analyzer

*The Most Advanced
Wavefront Lens Analyzer*

Automatism and precision

Comparisom between progressives

Automatic lens type detection

Complete analysis

Easy to use

VX 40 Lens Analyzer

Wavefront technology

This new generation of completely automatic lens analyzers is based on Visionix Wavefront technology. Pressing one button, you have an analysis of the entire lens.

Automatism and precision

With its innovative system of frame support, the VX 40 is the only lens analyzers in the market which combines automatism with high precision measurement.

Comparison between different progressive designs

The lens is mapped and studied over the entire area, hence freeform progressive lenses can be compared and analyzed.

Automatic lens type detection

The VX 40 detects all types of lenses : progressive and single vision lenses as well as bifocals. It is compatible with all lens technologies and brands

Complete analysis

With the VX 40, each point of a lens is studied. Progressive and freeform lenses will no longer be a mystery.

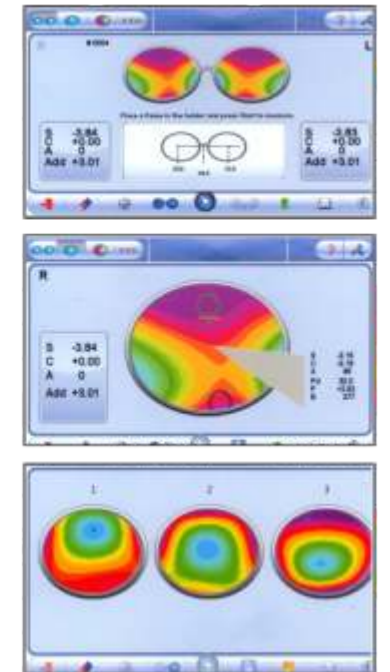

Easy to use

The unique lensholder system allows a fast insertion of the frame with only one hand. After pushing the measurement button the whole process works on its own. The VX 40 allows you to spend more time with your patient and less time on lens analysis.

Technical specifications

General data	
Dimensions	W 220 mm x H 455 mm x D 240 mm (W-8.66 in H-17.9 in D-9.44)
Weight	9 Kg (20 lbs)
Printer	Internal
Screen	LCD/16M colours, 7"
Light source	Led - 730 nm
Working conditions	10 to 40° C
Power supply	115/230V - 50/60 Hz
Standards	CE
Data output	RS-232, Bluetooth
Measurement range	
Sphere power	-15~ +10D (step 0.01, 0.06, 0.125, 0.25D)
Cylinder power	0~10D (step 0.01, 0.06, 0.125, 0.25D)
Cylinder axis	0~180° (step 1°)
Addition power	0~ ± 3.5D (step 0.01, 0.06, 0.125, 0.25D)
Prism power	0~ ± 10Δ (step 0.01Δ)
PD measurement	Mono / Bino
Cylinder	-, +
